ourterms//

Office Hours: Monday thru Friday 7:00 am to 3:30 pm (CST)

Terms: Our terms are NET 30 DAYS on all new and current accounts. Payment required in Advance if not current, even if the order is complete or not. Shipments will be held if an account contains invoices over 30 days past due. The account will go on permanent Payment in Advance Status when there is a history of past dues. Third party collection fees and legal fees must be paid in full before an account can be reopened.

Prices: All prices are subject to change without notice. Prices reflect single unit cost, except where noted.

Freight: Freight will be prepaid and added to your invoice, unless a freight account is provided. Freight charges are part of your invoice and are due accordingly. Freight charges are not discountable.

Proof Of Delivery: We will provide proof of delivery at your request. The fee for proof of delivery is \$15 if the customer received the package, no charge if it was lost in delivery. Be absolutely sure you did not receive the package before calling for proof of delivery.

Returns: No item will be accepted for return after 30 days from date of purchase. All returns must be labeled with a return authorization number which can be obtained from our customer service department. **Claims for shortage, breakage or any other reason must be made within 48 hours of receipt. Shipping containers must be kept if shipment is damaged or short. All returns are subject up to a 35% restocking fee. The customer is responsible for all freight charges incurred.**

Cancellation Charges: Orders may be canceled without charge providing your request is received prior to shipment. If the merchandise has been shipped there will be up to a 35 % restocking fee, plus all freight charges incurred. Please get cancellation confirmation to avoid these charges.

Other Order Information: We reserve the right to split shipments. We sell on first come first serve basis. Where available, substitutions will be shipped if the product ordered is not available or discontinued.

FERNO MRI **STRETCHER** ⚠️

Model 30NM The "Standard" and the lightest lift-in cot in the industry. Ferno's Model 30 Multi-Level, Lift-in Cot served as the industry standard for many years and is still used by many ambulance companies and medical facilities. The Ferno Model 30 cot adjusts to six height levels, enabling patient transfer from most nursing home beds or hospital treatment tables. To operate the height adjustment mechanism, the EMTs must assume the patients weight prior to raising or lowering the cot-bed frame. Because the Model 30 must be lifted to be loaded into the vehicle, it can be used with ambulances that have various floor heights. The Model 30 cot will work well in station wagons, vans or modular ambulances. The telescoping head-end main frame section allows the Model 30 cot to be shortened for maneuverability around tight corners and spaces. The Model 30NM is the Non-Magnetic version for medical treatment areas where the cot must be non-magnetized.

FERROMAGNETIC DETECTION

Ferromagnetic detection systems have been demonstrated to be highly effective as a quality assurance tool, verifying the successful screening and identifying ferromagnetic objects which were not discovered by conventional screening methods. It is recommended that new facility construction anticipate the use of ferromagnetic detection screening and provide for installation of the devices in a location which facilitates use and throughput. The recommended use of ferromagnetic detection to verify the screening of patients before they pass through the controlled point of access into Zone III.

For utmost protection, deploy the screener as part of your comprehensive MRI ferromagnetic safety system; including our detection system guarding your magnet room doorway and ferrous-free patient transfer equipment.

MODEL #	DESCRIPTION	SHIP WEIGHT	SHIP L X W X H
MGM2510-01	FerrAlert II PLUS	45 lbs	8" x 13" x 85"

Ferromagnetic Detection System - MRI Entry System

Adverse MRI incidents are on the rise. While the number of incidents is small compared to the number of procedures performed, even one is too many for any clinic, hospital or research facility.

Our Ferromagnetic Detector protects the magnet room against moderate to large size ferromagnetic projectiles. This product significantly helps to protect the investment in the magnet and to avoid a catastrophic accident.

Operation

The **GREEN** LED array illuminated around the MRI entrance indicates that the detector is scanning and there are no ferromagnetic threats detected.

A **YELLOW** beacon light indicates that a threat is approaching the portal.

The **RED** LED array flashes the entire portal, indicating a major threat such as a ventilator or oxygen cylinder has approached the portal.

The greater the threat, the further away the warning is activated.

Ferrous objects not approaching the entrance to Zone IV do not trigger an audible warning.

Features

The highest sensitivity system available, detects even the smallest ferromagnetic objects.

Enables you to screen your patients without impacting workflow and existing team practices.

Becomes a simple step in your MRI safety routine.

Demonstrates to your patients just how serious you are about their safety and MRI image quality.

MODEL # **RAM6001-01 NYLON 1000 PER CASE**

MRI safe eyeshade sleep mask. Made from satin soft polyester, this is the same mask provided by major airlines and hotels. Available in dark blue only (inside is black).
2 elastic straps.

Ship Weight: 5 lbs

Ship Dimensions: 8" x 8" x 12"

NON MAGNETIC **PRISM GLASSES**

MODEL # **RAM2013-01**

Features:

Fits over Prescription Glasses.

Do not reverse the image so it is possible to see a mural or projection screen TV.

Prism angle remains fixed in either position so no viewing angle adjustment is required.

Free of any metal components and may be worn in all types of Diagnostic Imaging Scans.

Similar to wearing a conventional pair of glasses so the patient will easily adapt to wearing them.

Ship Weight: 2 lbs

Ship Dimensions: 4" x 4" x 7"

NEONATAL **NOISE GUARDS**

A must have for premie and newborn patients, Neonatal Noise Guards protect these little one's sensitive ears in the MRI environment, and provide peace and quiet in the NICU. Neonatal Noise Guards reduce the surrounding environment noise level by at least 7db, with a reduction in sound pressure of more than 50%.

Disposable and latex free.

SMALL OR LARGE **SANITARY HEADSET** MR **COVERS** WHITE OR BLACK

MRI Non-Magnetic Sanitary Headset Covers prolong the life of headphones by keeping them clean and protect earmuffs from sweaty and unpleasant smells. Our headset cover will absorb oils and is a good hygienic practice in general. The elastic and stretchable material is ideal for a perfect fit. Prevent flakey headphone ear foam pad and earpieces on your headphones from breaking down, thus preventing the spread of infection. Our headset covers have no sound interference.

MRI STEREO HEADPHONE ADAPTER

MODEL #RAM1081-01

MRI Stereo Headphone Adapter is designed for use MRI scanners that have their own existing patient sound system and a headphone jack that looks like a small 90-degree angled plug. The single mono plastic plug style headphone port is common to most of the Siemens MRI scanners. The single tube port audio connection provides mono audio for the MRI headphones.

MRI-SAFE STETHOSCOPE STYLE PNEUMATIC HEADPHONE MR

MODEL #BPM1066-01

MRI-Safe Stethoscope Style Pneumatic Headphone is ideal for MRI sound systems. It is completely made from plastic and foam so it will not interfere with MRI scans. The Stethoscope style MRI headphone will fit into most MRI coils, including head coils. Sound travels through plastic tubing to the left and right headphone earpieces. The ear tips may be replaced after each patient so the headphones remain clean and fresh for repetitive use.

MRI-SAFE HEARING PROTECTIVE EARMUFFS MR

MODEL #RAM1066-01

MRI-Safe Hearing Protective Earmuffs are very effective in reducing the high levels of noise produced by MRI systems. They help to protect MRI patients from hearing damage. MRI-Safe earmuffs have an adjustable headband to fit adults, teens and children. Each padded earpiece contains 2 layers of cellular foam to absorb additional noise. Earmuff is certified MRI SAFE totally free of any metal components and safe for all MRI scanners. Noise reduction rating of 20 dB.

IN-EAR MRI HEADPHONES MR

MRIaudio's newly designed iN-Ear Headphones are the ultimate solution for providing MRI patients with music, communication, and hearing protection. Their low profile design allows them to fit into every head coil and disposable foam ear tips prevent the spread of infection.

Adjustable

The optional/removable headband adjusts to fit any size head, while the swiveling ear tip inserts fit into every ear perfectly!

Versatility

The standardized pneumatic tube connector means that they will work with most MRI patient stereos available.

iN-Ear Headphones are **MR Safe**

Comes with a 1 year warranty.

Specifications:

- Noise reduction rating of 29db
- Clear, consistent sound quality
- Compressible, high-density foam eartips
- 0.5" headband profile fits in most MRI head coils
- Adjustable headband fits most heads

ASTM SAFETY STANDARDS FOR MR ENVIRONMENTS

The highly anticipated Standard Practice for Marking Medical Devices for Safety in the Magnetic Resonance Environment by American Society for Testing and Materials (ASTM) has arrived.

As recommended by ASTM Intl; the intent of this practice is to provide needed information about the safety of items in and near MR scanners using a compact and easily recognized set of symbols and terms. The terms MR safe and MR compatible as first defined in 1997 in the FDA draft guidance document, "A Primer on Medical Device Interactions with Magnetic Resonance Imaging Systems," have been used to describe the safety of devices in and near MR systems. However, there has been a great deal of confusion surrounding this terminology. An incorrect assumption is often made, and users often incorrectly assume that items labeled MR safe or MR compatible are safe or compatible for any MR environment. MR environments vary in terms of magnetic field strength and RF conditions. This new system eliminates much of that confusion.

ICON DESIGNATION Products **NOT** marked with a designation have been tested under the past methods and are currently being re-evaluated under the new ASTM Standards. Products will be updated continually.

MR Safe

Any item that poses no known hazards in all MR environments.

MR Conditional

Any item that has been demonstrated to pose no known hazards in a specified MR environment with specified conditions of use. Field conditions that define the specified MR environment include field strength, spatial gradient, dB/dt (time rate of change of the magnetic field), radio frequency (RF) fields, and specific absorption rate (SAR). Additional conditions, including specific configurations of the item, may be required.

MR Unsafe

Any item that is known to pose hazards in all MR environments.

MRI BIOPSY TRAYS

SAFETY: The only MRI Non-Ferromagnetic Certified Biopsy Tray. Designed and certified within the guidelines of the new ASTM standards in effect so your facility no longer has to assume the liability for any safety accidents due to the items made with ferrous materials.

USAGE FLEXIBILITY WITH LESS WASTE: Based on customer feedback for increased ordering and procedure flexibility you'll note that we packaged the main biopsy components separately as well as in a MRI biopsy tray. Trays can also be used as a MRI localization tray.

UNIQUE DESIGN: The only MRI NON-Ferromagnetic certified disposable scalpel and MRI NON-Ferromagnetic certified needle.

COST EFFECTIVE: This product is a first of its kind. Developed by technologists who perform the procedures. It is cost effective, practical and safe to use. The trays are completely sterile and disposable.

MR CONDITIONAL TO: 3-Tesla
The trays have a 2 year expiration date.
MRI Biopsy Tray is **SAFE** in the MR environment when used in the prescribed fashion for all Tesla Strengths.

WATER FIRE EXTINGUISHER

The ultimate extinguisher for class A fires, especially where a potential Class C (electrical) hazard exists. The fine spray from the unique misting nozzle provides safety from electrical shock, greatly enhances the cooling and soaking characteristics of the agent and reduces scattering of the burning materials. Unequivocally the best extinguisher for hospital environments, telecommunications facilities and "clean room" manufacturing facilities.
